

Homework 4

Objective: To read the book An Introduction to Statistical Learning – with Application in R, available in PDF format. To prepare for class discussions.

- 1) Read chapter 5 in the book (only the topics presented in class). Specifically, do:
 - a. Identify at least three questions that you may have after reading the chapter. These questions should arise from a lack of understanding of what was described in the paragraph, examples, graphs, etc.
 - b. Identify at least three points discussed/presented in the book (in a paragraph, in the examples, or in the graphs, etc.) that you consider important for other colleagues to know.
 - c. Imagine that you are preparing questions for an exam. Prepare questions, followed by their respective answers, related to each of the three points you have presented in item b above.
 - d. Repeat item c for the item b you have presented in HW2.
 - e. Repeat item c for the item b you have presented in HW3.

Delivery deadline: no later than Tuesday, May 12th. You will have to respond to an electronic file (E.g., Word) and return it to peternelli@ufv.br. Your filename should be stated as follows: HW4_your_first_name.docx. The same filename should be the subject of your email to me, with the file attached.
